

White-Glove Electricians for Flawless Control Installs

Trusted licensed electricians delivering proven control systems —on time, every time.

Electrical Control Services and Solutions

For Critical Installations Where There Is No Room For Error.

Control System & Panel Services

- Industrial Control Panel Modifications & Replacements
- **Upgrades to Existing Equipment** (Conveyors, Process Controls, OEM Machines)
- VFD, Servo Drive & Motor Replacement
- Vision, Safety, and Pneumatic System Installations

Network & Infrastructure

- Copper & Fiber Optic Media Installation
- **Network Performance Certification** (up to Cat 6A & TIA 1005-E3)
- NEC & NFPA79 Compliant Cable & Wire Management
- Decommissioning of Outdated Network Media (DeviceNet, Profibus, etc.)

Verification & Commissioning Support

- Standalone I/O Checkout & Electrical Troubleshooting
- A valuable resource to **lessen the burden on your engineers**, even if we did not perform the installation.
- Performance verification using DB Loss testers for fiber optics.

Project Leadership & Coordination

- Consistent On-Site Leadership for all installation phases.
- Turnaround & Shutdown Coordination to minimize downtime.
- **Seamless Collaboration** with other electrical contractors.

Why Choose Our Team?

Licensed Electricians

We use licensed electricians who specialize in control systems, not general technicians.

On-Site Leadership You Can Trust

Every project benefits from consistent on-site leadership, ensuring accountability and flawless execution.

Focus on High-Value Support

We offer standalone troubleshooting and I/O checkout support, providing your engineers with a team of experts in industrial control wiring.

Ready for a Flawless Installation? Contact us today to schedule a consultation and ensure your next project is a success.
